

PROFESSIONAL SUMMARY

Backend-focused software engineer with 4+ years of experience building production web services, REST APIs, and data-driven applications. Strong in Python, Flask, PostgreSQL, cloud deployment, and performance optimization, with a track record of translating product requirements into reliable systems.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, SQL, Bash
Backend	Flask, FastAPI, Node.js, REST APIs, JWT, OAuth 2.0
Databases	PostgreSQL, Redis, MongoDB, SQLAlchemy
Cloud & DevOps	AWS, Docker, GitHub Actions, Nginx, Linux
Engineering	System design, testing, CI/CD, observability, API security

PROFESSIONAL EXPERIENCE

Software Engineer Nexora Technologies, Bengaluru

Jul 2023 – Present

- Designed and maintained Python REST services supporting customer onboarding and internal operations for a multi-tenant SaaS platform.
- Reduced average API response time by 34% through PostgreSQL query optimization, indexing, and targeted Redis caching.
- Implemented background processing for report generation using asynchronous workers, improving reliability for large data exports.
- Built automated unit and integration test suites and integrated them into GitHub Actions CI pipelines.

Associate Software Engineer BluePeak Digital, Bengaluru

Jun 2021 – Jun 2023

- Developed Flask-based APIs and internal tools used by operations and analytics teams across multiple business units.
- Created reusable authentication and authorization components using JWT and role-based access control.
- Worked with product and frontend teams to define API contracts, error handling, validation, and release requirements.
- Containerized services with Docker and supported deployments through Nginx and AWS infrastructure.

SELECTED PROJECTS

Interview Intelligence Platform Personal Project

2024

- Built a resume-driven interview practice platform that extracts candidate information and generates role-specific interview questions.
- Designed the system around Flask, PostgreSQL, GraphQL-based data access, and an external AI service for structured analysis.
- Added adaptive question selection based on technical skills, projects, target role, and previous interview performance.

Inventory Forecasting Dashboard Personal Project

2023

- Developed a dashboard that combined historical sales data with forecasting logic to identify potential stock-out risks.
- Created data-cleaning workflows and PostgreSQL queries for reporting and trend analysis.

EDUCATION

Bachelor of Technology in Computer Science
Riverview Institute of Technology, Bengaluru

2017 – 2021

CERTIFICATIONS

AWS Certified Cloud Practitioner · 2024 | Python for Everybody · 2022
